

AJITH S

.NET SOFTWARE ENGINEER

Tiruvannamalai, Tamil Nadu | +91 8056673453 | ajithsoftwareengineer@gmail.com

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of professional experience specializing in .NET Full-Stack Web Development, RESTful Web API integration, and enterprise application support. Expert in investigating complex production issues, conducting thorough root-cause analysis (RCA), and collaborating effectively across backend, frontend, database, and API teams to deliver high-uptime solutions. Proficient in C#, ASP.NET Web API, Visual Basic (VB), React.js, AngularJS, Angular, and SQL Server, with a proven track record of optimizing high-traffic travel portals (B2B, B2C, White Label) and reducing production defects through structured debugging and Agile methodologies.

TECHNICAL SKILLS & COMPETENCIES

- **Backend & APIs:** C#, ASP.NET Web API, Visual Basic (VB), RESTful API Integration, Backend Business Logic, JSON Parsing, Microservices Concepts
- **Frontend Web Development:** React.js, AngularJS, Angular (Components, Directives, Data Binding, Services, Hooks, State Management), JavaScript (ES6+), HTML5, CSS3, DOM Manipulation, On-Page SEO
- **Database Management:** Microsoft SQL Server, Stored Procedures, T-SQL Queries, Query Optimization, Normalization
- **Engineering & Support:** Root-Cause Analysis (RCA), Bug Tracking & Resolution, Production Support, Defect Triage, API Integration Testing
- **Tools & Platforms:** Visual Studio, VS Code, Postman, Git / Version Control, Cursor, Agile / Scrum Methodology

PROFESSIONAL EXPERIENCE

Software Engineer | STT PayTech — Chennai, Tamil Nadu

2023 – Present

- **Application Maintenance & Feature Enhancements:** Maintained, upgraded, and supported high-scale enterprise travel booking platforms using C#, ASP.NET, Web API, React.js, AngularJS, Angular, JavaScript, and SQL Server across B2B, B2C, White Label, and Web API solutions.
- **Root-Cause Analysis & Production Support:** Analyzed complex production bugs and system failures across frontend, C# backend API, and database layers; performed comprehensive root-cause analysis (RCA) to eliminate recurring operational defects.
- **Cross-Functional Team Collaboration:** Partnered closely with dedicated Database Administrators, API Engineers, and QA specialists to identify data mismatches, ensure seamless multi-tier communication, and rapidly resolve integration blockers.
- **Backend API Development & Integration:** Engineered and maintained C# backend services and Web API endpoints facilitating critical business workflows, including real-time search, availability validation, booking confirmation, ticket cancellations, and refund processing.
- **Third-Party Booking Engine Integrations:** Integrated and troubleshoot third-party RESTful APIs for Flight, Hotel, and Bus service providers, efficiently handling payload transformations, HTTP status codes, and error logging.
- **Frontend UI & State Management:** Built modular React.js, AngularJS, and Angular components, custom directives, and asynchronous JavaScript (ES6+) functions to deliver responsive, user-friendly UI flows with seamless data binding.
- **Database Query Optimization:** Authored and optimized SQL Server stored procedures, complex views, and indexing strategies to support dynamic booking transactions and minimize database latency.
- **Quality Assurance & Deployment Validation:** Utilized Postman for endpoint testing and payload verification, used RockMongo for NoSQL document verification, and validated hotfixes across staging and production environments to guarantee release stability.

PROJECT HIGHLIGHTS

B2C Travel Booking Platforms (Happyfares & Travelopedia)

Technologies Used: C#, ASP.NET Web API, React.js, AngularJS, JavaScript, SQL Server, REST APIs

- Engineered complete end-to-end B2C web applications enabling real-time flight, hotel, and bus reservations with automated fare comparison, interactive seat mapping, and payment gateway integration.
- Diagnosed and resolved critical client-side and server-side production defects, including session timeouts, booking state mismatches, and payment discrepancies.
- Collaborated with backend & database teams to ensure data integrity during peak booking loads and implemented on-page SEO best practices for optimized client landing pages.

B2B Travel Portal & White Label Solutions (Flycreative)

Technologies Used: C#, ASP.NET Web API, React.js, AngularJS, SQL Server, Multi-Tenant Architecture

- Maintained and enhanced an enterprise B2B distributor/retailer portal handling multi-step registration, document uploads, and dynamic role-based module enablement (Flight, Hotel, Bus).
- Built tenant-customizable White Label solutions featuring client-specific branding, dynamic color themes, and domain-mapped portal deployments.
- Investigated multi-tier production tickets across React.js/AngularJS views, C# web endpoints, and SQL Server tables, significantly decreasing ticket resolution turnaround time.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering

2016 – 2020

Peri Institute of Technology, Chennai | CGPA: 6.44 / 10
